11	10177	Subdistrict anomaly	Amount anomaly vs subdistrict	1.00

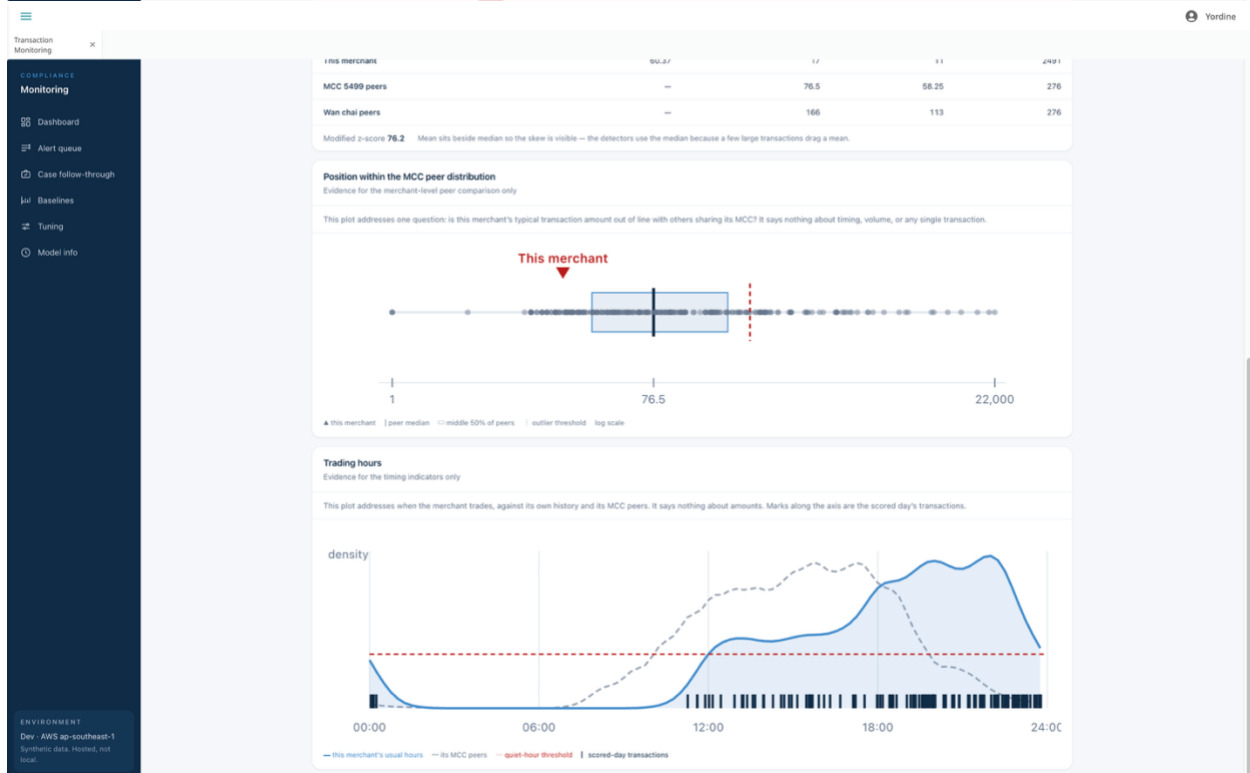

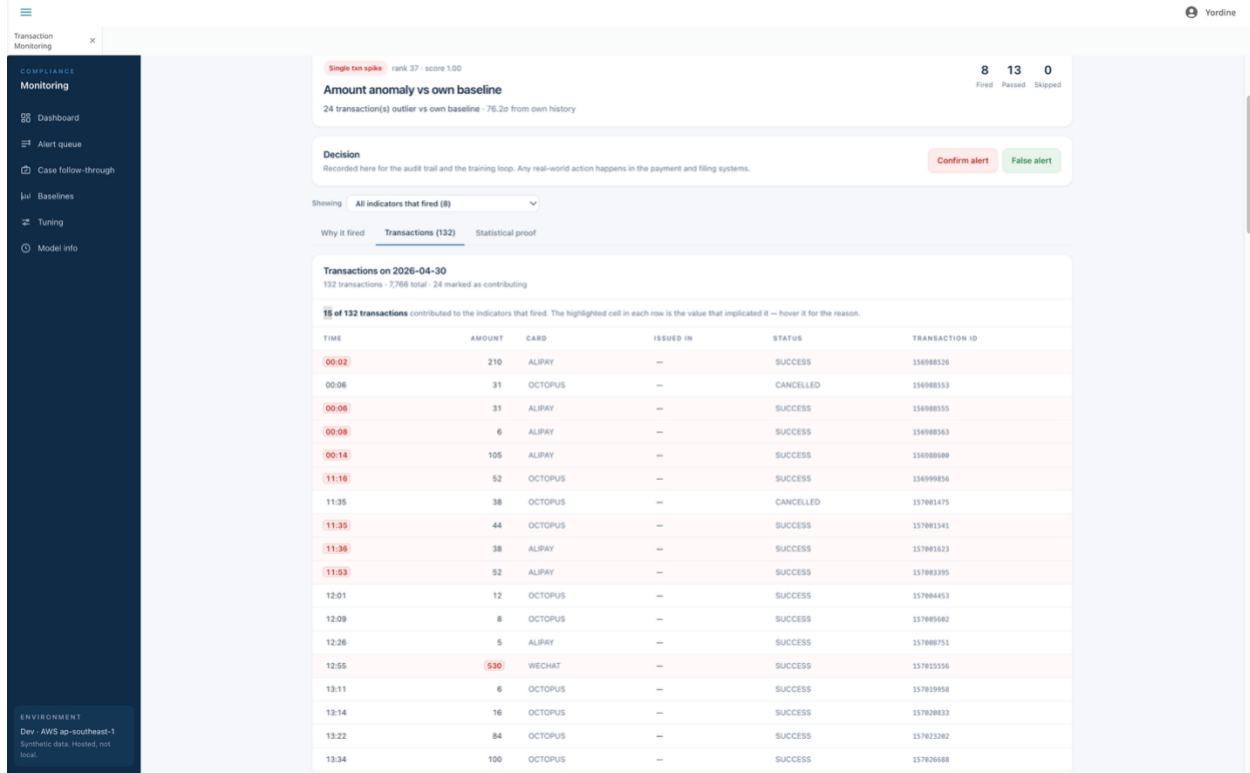

ENVIRONMENT

Dev - AWS ap-southeast-1

Synthetic data. Hosted, not local.

There are different baselines which can be tuned to meet the different needs of the different merchant categories.

Different statistical graphs are displayed to provide compliance team with insights regarding the transactions of the merchant in order to make more informed decisions. Transactions that deviate with statistical significance from the baseline are flagged and the specific reason is highlighted by the red outline drawn around the certain value for ease of use.
