

11th September, 2026

To Whom It May Concern,

I am pleased to recommend Yordine Chimbutane, a Mechanical Engineering student at The Hong Kong Polytechnic University, who worked under my supervision during his summer internship in 2026.

Yordine built a transaction monitoring pipeline for our Compliance Team, delivering a high-quality solution that improved the team's workflow and received positive feedback. He also contributed to a new card-issuing app by defining its user interface and user experience, mapping user journeys, and specifying system features.

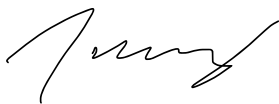

I was particularly impressed by his ability to learn quickly and apply sound problem-solving skills beyond his academic discipline. He approached unfamiliar challenges thoughtfully and translated his research into practical results. He used AI tools effectively while demonstrating a clear understanding of his solutions and taking ownership of their quality.

Yordine was responsible and well organised. He provided regular progress updates and maintained detailed documentation, using GitHub for version control of his code and documentation. His initiative, reliability, and attention to detail made him a valuable contributor throughout the internship.

I confidently recommend Yordine for engineering positions. His problem-solving skills, adaptability, and willingness to learn give him a strong foundation to develop into a highly capable engineer and contribute effectively to any team.

Please feel free to contact me for any further information.

Yours sincerely,

Tommy Lam
